Dear Friends:

My letter to you is one of the many Northern California residents who wish to keep our natural source of water under the control of Northern California residents.

I was born in Chico, California in 1915 and lived in Southern California, as a L.A. City School teacher for many years. While there, I was aware of the great demands for Southern California to desire a strong grasp of Northern California water.

Now that I am once again a citizen of Chico, California, I want to do all I can to keep this water supply for Northern California needs. This area is growing and growing with industries as well as population growths. There is no telling how soon the later needs of Northern California water will equal the water needs of Southern California.

I'm not in favor of more dams, but I am greatly in favor of HOLDING AREAS of water that normally flows into the Pacific Ocean. With off-stream storage areas of water, this would be of great help to all of us.

Now that I am HERE, I will keep a watchful eye on all that goes on with the CALFED Bay-Delta Program.

Sincerely,

Mrs. ARAKS V. Tolegian
